COMMUNITY SYSTEMS PROGRESS INDICATORS

The DMH/DD/SAS Quality Management Team releases a quarterly report of Community Systems Progress Indicators for each LME in North Carolina. The tables and summaries presented over the next few pages present information for the Durham LME, comparing the data to other Urban LMEs (counties with an average of 200 or more persons living per square mile) and Statewide, which includes Urban, Rural and Mixed LMEs. Any indicators about which we have concern are then shared with an internal committee for review and recommendation of how we can improve.

Timely Access to Care

Rationale: Timely access to appropriate care is critical to protect consumer health and safety, minimize adverse consumer outcomes and promote consumer engagement in services.

For emergent care, qualified provider delivers immediate care when consumer is available to receive it (within two hours of the request).

Quarter/FY	Target	Durham	Urban	State
2nd Qtr FY09	100%	100%	99%	97%
1st Qtr FY09	100%	100%	99%	98%
4th Qtr FY08	100%	100%	98%	97%
3rd Qtr FY08	100%	100%	98%	98%

For urgent care, a face-to-face service (assessment and/or treatment) is provided within 48 hours of the request.

Quarter/FY	Target	Durham	Urban	State
2nd Qtr FY09	88%	76%	91%	79%
1st Qtr FY09	88%	89%	94%	77%
4th Qtr FY08	88%	77%	89%	79%
3rd Qtr FY08	88%	73%	88%	79%

For routine care, a face-to-face service (assessment and/or treatment) is to be provided within 14 calendar days from the date/time of request; in second quarter, the standard was seven calendar days.

Quarter/FY	Target	Durham	Urban	State
2nd Qtr FY09	88%	87%	77%	67%
1st Qtr FY09	88%	87%	75%	66%

3rd Qtr FY08	69%	74%	72%	66%

COMMUNITY SYSTEMS PROGRESS INDICATORS

Services to Persons in Need

Rationale: North Carolina has designed its public system to serve those persons who have the highest need for ongoing care and limited access to privately-funded services. Increasing delivery of services to these persons is a nationally accepted measure of system performance. This indicator is measured by comparing the **prevalence**, or percent of the population estimated to have a particular condition in a given year, to the **treated prevalence**, or percent of the population in need who receive services for that condition within a year.

Estimated Persons In Need Of Services: These numbers were calculated by multiplying the most current available statewide prevalence rates for NC for Mental Health issues, Developmental Disabilities, and Substance Abuse by the July 2008 county population projections for each relevant age group for each county in each LME's catchment area.

Sources:

- ◆ Population Data: State Demographics Unit (<http://demog.state.nc.us>), July 2008 Population Projection (last update 6/9/08)
- ◆ Mental Health Prevalence Rates: Prepared by NRI/SDICC for CMHS, June 14, 2008 (for the MH Block Grant)
- ◆ Substance Abuse Prevalence Rates: SAMHSA, Office of Applied Studies, National Surveys on Drug Use and Health, 2004-05
- ◆ Developmental Disability Prevalence Rates: Report by the US DHHS, Surgeon General (2001) based on data from the 1994 and 1995 National Health Interview Survey (NHIS) Disability Supplement, Phase I, Estimated Ages of People with MR/DD in US Non-Institutional Population.

Treated prevalence rate is shown for each age group and disability population on the next page.

COMMUNITY SYSTEMS PROGRESS INDICATORS

Timely Initiation and Engagement in Service

Rationale: Best practice for initiating and engaging consumers in care suggests that an individual receive two visits within the first 14 days of care and an additional two visits within the next 30 days (a total of four visits within the first 45 days of service). These timelines provide the best opportunity for an individual to become fully engaged in services that can promote recovery and stability.

COMMUNITY SYSTEMS PROGRESS INDICATORS

Effective Use of State Psychiatric Hospitals

Rationale: State psychiatric hospitals provide a safety net for the community service system. An adequate community system can and should provide their residents with crisis services and short-term inpatient care close to home. This helps families stay in touch and reserves high-cost state facility beds for consumers with long-term care needs. *Reducing* the short-term use of state psychiatric hospitals is a goal that also allows more effective and efficient use of funds for community services.

State Psychiatric Hospital Readmissions

Rationale: Successful community living, without repeated admissions to inpatient psychiatric care, requires effective coordination and ongoing appropriate levels of community care after hospitalization. A low psychiatric hospital readmission rate is a nationally accepted standard of care that indicates how well a community is assisting individuals at risk for repeated hospitalizations.

COMMUNITY SYSTEMS PROGRESS INDICATORS

Timely Inpatient Follow-Up

Rationale: Living successfully in one's community after discharge from a state-operated facility depends on smooth and timely transition to community services/ supports. Receiving a community-based service within 7 days of discharge is a nationally accepted standard of care that also indicates the local system's community service capacity and coordination across levels of care.

COMMUNITY SYSTEMS PROGRESS INDICATORS

Child Services in Non-Family Settings*

Rationale: Children and adolescents served in the most natural and least restrictive community settings appropriate to their needs are more likely to maintain or develop positive family and community connections and to achieve other lasting, positive outcomes.

Overall Performance on Community Systems Progress Indicators

The Durham Center met or exceeded SFY2009 Performance Standards for 11 of the 23 indicators that had defined standards for the second quarter of FY 2009 and 14 of the 23 indicators for the first quarter. The unmet standards are mostly related to hospitalization: effective use of state psychiatric hospitals, state psychiatric hospital readmissions within 30 days and within 180 days of discharge, and timely follow-up after inpatient care at Alcohol and Drug Addiction Treatment Centers. Other areas were timely initiation and engagement in services for Developmental Disabilities. The remaining three unmet indicators were a percentage or two within the target.

PERFORMANCE CONTRACT OUTCOMES

On a quarterly basis, the DMH/DD/SAS Quality Management Team releases a report that includes data on the performance requirements specified under the Performance Contract. The requirements address three main areas, including: 1) Clinical Performance, 2) System Management Performance and 3) Administrative Performance.

On the following pages, each requirement and its standards are defined, and the Durham LME and Statewide results are displayed for the past four quarters.

Third Quarter (January-March) FY08:

Durham met 14 (93%) of 15 performance standards that were applicable this quarter. Statewide, LMEs met 88% of the standards.

The single unmet area this quarter was associated with the timely submission of all expected NC-TOPPS Update interviews by provider agencies. No LMEs met this entire requirement; however, Durham is one of only six LMEs with over 90% compliance with submission of expected NC-TOPPS Update interviews.

Fourth Quarter (April-June) FY08:

Durham met 14 (93%) of 15 performance standards that were applicable this quarter. Statewide, LMEs met 89% of the standards.

The single unmet area this quarter was associated with the timely submission of all expected NC-TOPPS Update interviews by provider agencies.

First Quarter (July-September) FY09:

Durham met 10 (77%) of the 13 performance standards applicable for this quarter. Statewide, LMEs met 78% of the standards.

The unmet areas this quarter were related to CDW unknown values for admissions and discharge data. NC-TOPPS Update Assessments did once again not meet the standard.

Second Quarter (October-December) FY09:

Durham met 14 of the 15 (93%) applicable performance standards in the second quarter. Statewide, the LMEs met 78% of the standards.

PERFORMANCE CONTRACT OUTCOMES

Incident Reporting

Performance Requirement: The LME analyzes Level II and Level III incidents reported by providers, in accordance with 10A NCAC 27G .0600, to determine trends and take action to make system improvements. The LME shall submit quarterly reports [by the 20th of the month following the end of the quarter] summarizing Level II and Level III incidents reported by providers. The report will include summaries of (1) data analyses to identify patterns and trends, (2) strategies developed to address problems, (3) actions taken, (4) the evaluation of results and (5) next steps.

DHHS will review the reports for evidence of an effective incident review process.

SFY 2009 Standard: Each report shows clear evidence of an effective process containing all five elements (1-5 above).

NC Treatment Outcomes and Program Performance System (NC-TOPPS) Initial Assessments

Performance Requirement: The LME, through providers, will collect outcomes information on its consumers following sampling methods and reporting schedules for the instrument being used. The NC-TOPPS is required for all MH/SA consumers ages six and older and shall be entered in the web-based system within 30 days of completion of the assessment as specified in the NC-TOPPS Implementation Guidelines. The expected number of initial assessments will be based on the number of consumers in the relevant target populations for whom services are reimbursed through the IPRS or MMIS reimbursement systems during the time period under review.

SFY 2009 Standard: 90% of the expected initial forms are received on time.

NC Treatment Outcomes and Program Performance System (NC-TOPPS) Update Assessments

Performance Requirement: An update assessment must be completed within two weeks before or after the required update month (e.g. 3-months, 6-months, 12-months, 18-months, etc). All update assessments shall be complete and accurate. The DMH/DD/SAS shall annually sample consumers with initial assessments to determine the timeliness and accuracy of 3-month update assessments. The 3-month update assessments shall be administered between 76 and 104 days after the initial assessment.

SFY 2009 Standard: 90% of the expected update forms are received and are timely.
